**– The MAILING DATE of this communication appears on the cover sheet with the correspondence address –**  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

***Double Patenting***

The nonstatutory double patenting rejection has been overcome by applicant's terminal disclaimer.

***Claim Rejections - 35 USC § 101***

The rejection under 35 U.S.C. 101 has been overcome by applicant's amendments and arguments.

***Claim Rejections - 35 USC § 102***

Applicant's arguments have been fully considered but they are not persuasive. The rejection remains because applicant is still claiming a culture of the bacteria taught in the prior art having undergone a transient metabolic change. Culture claims wherein the claims recite that the culture includes the necessary culture media constituents to induce the desired change would likely be free of the art.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 31-47 are rejected under 35 U.S.C. 102(b, e) as anticipated by Henick-Kling et al(6284518), Picataggio et al(5798237) , Porubcan et al(4115199) & Goto et al(3655396) and Kaneko et al(5075226).

Henick-Kling et al(6284518), Picataggio et al(5798237) , Porubcan et al(4115199), Goto et al(3655396) and Kaneko teach lactic acid bacteria grown using a variety of carbon sources under anaerobic or aerobic conditions, compositions thereof including cryopreserved and freeze-dried versions for use as a starter culture. In fact, it is notoriously old and well known that this class of bacteria can be grown in a vast variety of media from the complex undefined to specific defined media. The claimed bacteria culture *per se* are not different from those of the prior art because of a temporarily induced metabolic change. The references anticipate the claim subject matter.

*Conclusion*

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
